Parent’s Night by Cheryl Friberg, Ph.D.

Nurturing the Nature of Young Gifted Children

Is your child socially or emotionally excitable? Children are thinking and feeling beings whose voice in all of time has not existed until now. This session will focus on the uniqueness of high-end learners who may not always fit into the common development of their same age peers. Topics such as uneven development, intense emotions, and what children need to develop their talent and reach their optimal potential will be discussed. While parents are in session, children will enjoy storytime provided by UL Lafayette teacher candidates.
